

MY FIRST FULL YEAR OF  
RUNNING MY BUSINESS.

# LESSONS AND PIVOTS

SWIPE →

**We posted 76 times  
on Instagram, and  
went from 0  
followers to 33.**

That's a tiny number. I wrote about  
it anyway, along with everything  
else I tried this year.

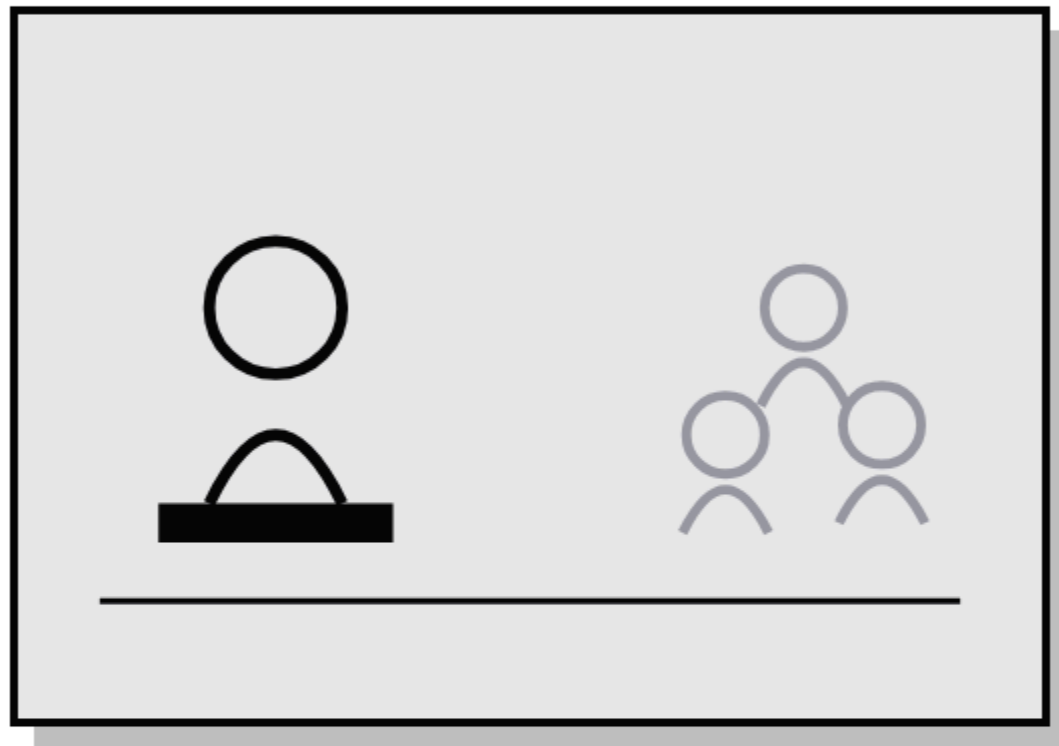

Some of it **really didn't work.**  
The comics took hours to  
make.

**And never reached anyone new  
on Instagram.**

What helped most was working out what each flop was telling me.

We learned Instagram carousels **don't get shown to non-followers**. A poor way to get discovered there.

A conference full of the wrong audience taught me to work out **who I'm building for** before I turn up, not after.

**So every experiment pointed somewhere better. Including the pivot: helping women who can't code yet build their own products.**

The pivot, and the flops that led to it, is what the full article is about.
